

Please do not disturb our Indiana no call law. I am a nurse and work a late shift. It has been wonderful to be able to sleep without interruption by unsolicited callers. I have elderly parents, children and grandchildren who may need to call me and do not like to turn my phone off. I should not have to pay for a separate private line to prevent this. They all know not to call unless it is urgent. Why should I have to be awakened by someone who cannot even pronounce my name. Please let me continue to get the sleep I need. Thank you.
